

Lypo-Spheric™ GSH

- 450 mg Non-GMO Glutathione SulfHydryl (GSH)
- 500 mg Non-GMO Phosphatidylcholine (PC)
- Each carton contains 30 packets
- Supports Paleo, Zone and Vegan diets

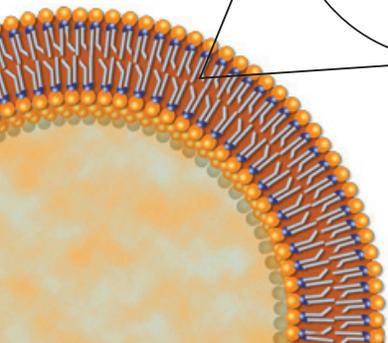

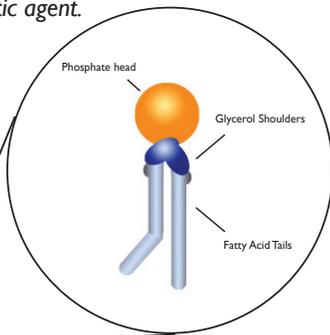

With Lypo-Spheric™ GSH, you get the benefits of Glutathione and satisfy the body's need for essential phospholipids, including Phosphatidylcholine (PC).

PC is one of the most important phospholipids required for maintaining a healthy cardiovascular, reproductive, immune and nervous system.

What are Liposomes?

Liposomes are bilayer (double-layer), liquid-filled bubbles made from phospholipids. Over 50 years ago, researchers discovered that these spheres could be filled with therapeutic agents and used to protect and deliver these agents into the body.

This diagram of a liposome cutaway shows how the tails of phospholipids turn inward to form a bilayer membrane, and encapsulate a therapeutic agent.

Lypo-Spheric™ GSH
(Glutathione SulfHydryl)

LivOnLabs.com

Why are Lypo-Spheric™ Products Superior to Pills and Powders?

The Difference is the Delivery. With our Liposomal Encapsulation Technology, you absorb more.

After all, what's the point of taking a high-dose supplement if you're only absorbing a fraction of what you're ingesting? We have created a supplement with power that surpasses the competition with its bioavailability.

LivOn Labs' 21st century delivery system ensures that nutrients get into your cells where they are needed most.

IT'S ALL ABOUT THE DELIVERY!

LivOn Labs' nutrients are encapsulated and protected by microscopic bubbles called Liposomes (Lypo-Spheric™).

Liposomes are made of Phospholipids, the same material that makes up your cells - allowing the nutrients to pass through the cell membrane, intact and ready to work.

Unlike pills and powders which are flushed from your system, Lypo-Spheric™ products pass through your digestive system unharmed.

No bowel intolerance and no vitamin flush means more of the nutrient reaches your cells.

Lypo-Spheric™ GSH (Glutathione SulfHydryl)

Every cell in the body needs GSH (Glutathione SulfHydryl) - a tripeptide composed of the amino acids L-cysteine, L-glutamate and glycine. In fact, when a cell loses all of its GSH, it dies!

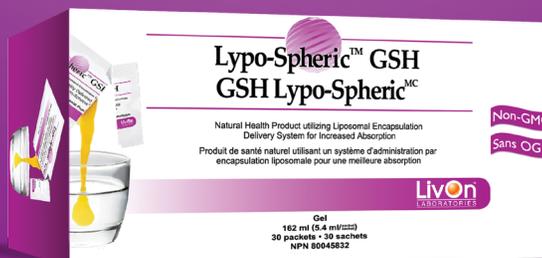

Physical and emotional stress, pathogens, toxins, free-radicals and aging - all of these factors, separately and together - can significantly reduce and even deplete intracellular levels of GSH.

Lypo-Spheric™ GSH delivers glutathione - one of the most important antioxidants for the maintenance of good health - to your bloodstream and your cells, intact and ready to work.

There is no better way to boost GSH levels!

Experts Agree

A new study published in the European Journal of Nutrition revealed that daily supplementation of Setria® Glutathione – the form of L-Glutathione used in Lypo-Spheric™ GSH – is effective at increasing body stores of glutathione by 30-35% over a 6 month period.

Why Should You Choose Lypo-Spheric™ GSH?

Traditional oral GSH supplements encounter one major problem: the digestive system destroys Glutathione. Until recently, the answer has been to take GSH precursor supplements or go to a medical office for painful, expensive intravenous injections of GSH.

GSH precursor supplements - the ones that are merely GSH building blocks - depend on cells to construct GSH in the body. Problem is, reconstruction is not guaranteed. This process requires circumstances and energy that are often lacking in cells and tissues deficient in GSH.

With Lypo-Spheric™ GSH, you are getting 450 mg of reduced (the active form) Glutathione delivered intact to the bloodstream and available for immediate action wherever your body may need it.
